---

I've attached the 2012 and 2002 images without the grids. Also I attached the 2012 image with 10' interval elevation contours.

I wasn't sure if you needed elevation, but I remember that you mentioned it in an email.

Jeff is trying to order any imagery in the 90's that TNIRIS might have for the area. I've pulled many images, but none have been at a usable resolution. Hopefully TNIRIS will have something!

Melody, can you resend me these two pdfs without the grids. The yellow box outlining the municipal property is okay. Thanks.

Hi Vincent,  
I added another row to the 2012 photo map, and created another map with 2002 photo.  
Still looking for an earlier photo of the area.

See what you think of the grid on the attached map. I can shift it around to find better corner anchors, if you'd like.  
I tried to line up the east side by the property line and light pole.  
I'll work on finding an earlier image on Monday.  
Have a good weekend!  
Melody

Melody,

can you see what historical coverage is available for the Circle Court Site, with the specific area of interest outlined in the green box in the attached site map. A drum with a trichloroethylene label was recently found in an overgrown area along an east-west fence line within the green box and may be related to previous landowners. A verbal description provided by a property owner indicated the past presence of a barn and trailer within the northern portion of the green box (there is now a new house that was constructed in 2011). Thanks.

Also, can you overlay a grid on 50 ft. spacing within the red box in the attached file. Thanks.
